Dear Sir,

BritLED is an innovative growing company based in Chesterfield England, who manufacture and design British made LED lighting products and solutions. The company has successful trading relationships with organisations like British Gas, British Police, John Lewis Partnership, NHS Trust, Leicester Council, as well as many independent companies to highlight their diversity.

BritLED works in direct partnership with the 4th largest LED manufacturer SEOUL SEMICONDUCTOR with a turnover of \$1billion and growing yearly. With expertise and the experience of Seoul BritLED provides high quality luminaries to meet your lighting requirements. All our lighting solutions are backed by a secure warranty for a period of 2-5 years dependent on the product but more importantly work to meet your payback objectives and to reduce your business operating costs. BritLED products are made in the UK and are available at very competitive prices. As manufacturers the company can provide OEM solutions on all their products for your brand. After a substantial amount of research and development BritLED have perfected the process of creating LED light engines to fulfil any lighting requirement whilst providing unsurpassed energy savings.

The company have spent over 20 months purely on research and development designing and producing commercial internal and external LED products and lighting solutions, including energy efficient external lighting in standard and solar format for applications where mains supply proves to be an issue.

BritLED aim to supply quality British range of products and lighting solutions, which could help your organisation save vastly on your energy expenditure (Many of our products can save up to 50% energy comparing to regular incandescent bulbs or fluorescents) , integrate seamlessly into many property types, produces very little heat (stays cool to the touch) comparing to the other types of lights and also save huge sums on routine replacement maintenance due to the longevity of LED lighting (Long lifespan > 30,000-50,000 hours) .

In the UK BritLED works in partnership with the Carbon trust to comply with best environmental practice and to deliver energy efficiency lights solutions to small and large businesses.
