Opening up trade between the UK and Iraq

## Iraq UK Gateway

The Iraq UK Gateway was established to increase the flow of trade between UK and Iraq by providing Iraqi companies with credible access to the British industry and to help them to source high quality and good value British products, at the same time the Iraq UK Gateway offers British businesses a gateway to explore new business opportunities in Iraq and to develop their market internationally. We are the exclusive representative of the following British manufactures in Iraq:

**Steadvale** : It's a British company founded in 1979 and it is now one of the UK leading independent providers of Compressors/Dryer servicing and spare parts supplies. Steadvale's head office and factory is a modern, purpose built 38,000 sq. ft. facility of warehousing & manufacturing plant. It is home to a diverse parts inventory, as well as holding large stocks of complete machines, which are available for supply.

Steadvale supplies spares all over the world via its Export Division, these spares range from consumable spare's to major hardware components such as cylinders, pistons, piston rods, crankshafts and piston rods. Steadvale Air Systems is also a distributor of Almig compressors and dryers in the United Kingdom and they have a permission from the German manufacturer to supply Almig's compressors and dryers to Iraq via The Iraq UK Gateway.

**BritLED** : It is an innovative growing company based in Chesterfield in England, who manufactures & designs British made LED lighting products and solutions. BritLED provides high quality LED luminaries to meet their clients lighting requirements and all the company's lighting solutions are backed by a secure warranty for a period of 2-5 years dependent on the product but more importantly work to meet the client's payback objectives by reducing the business operating costs and providing unsurpassed energy savings. BritLED products are made in the UK and are available at very competitive prices.

BritLED ethos is supplying a quality British range of products and lighting solutions, which could help organisations save vastly on their energy expenditure (Many of our products can save up to 50% energy comparing to regular incandescent bulbs or fluorescents), integrate seamlessly into many property types, produces very little heat (stays cool to the touch) comparing to the other types of lights and also save huge sums on routine replacement maintenance due to the longevity of LED lighting (Long lifespan > 30,000-50,000 hours) .

Opening up trade between the UK and Iraq

**POSIThread**: The company was established in 1986 to manufacture and grind carbide Inserts specifically for the threading market. Posithread utilises the unique technology in the manufacture of formed Electro Plated Diamond Wheels to allow the flexibility to mass produce standard & bespoke threading inserts within fine tolerances.

Over the last ten years Posithread has expanded, introducing new threading Product lines and now incorporates the manufacture of Oilfield Premium Threads under License to: VAM, JFE, TENARIS, NIPPON STEEL.

Posithread inserts are designed and manufactured on site by a staff of highly trained grinding technicians, utilising state-of-the-art 5 axis profile grinders as well as creep feed technology, and 25 years of amassed Profile Grinding techniques. Posithread threading knowledge pooled together over a quarter of a century of production is now second to none, moving the company into new areas of the Global Market.

Posithread manufacturing expertise and the support given by our global sales team has become a winning combination for our worldwide customer, such as: Weatherford, FMC, Baker Oil, Halliburton, Weir Group, Hunting Energy, Cameron Oil, Schlumberger, GE Oil and Gas (Vetco Grey), Petro Quip, etc. The recognition and success within the oil and gas industry has gained Posithread acceptance into world-wide markets. Since then the company has been approved to manufacture premium threads, and has license agreements with Hunting's, Tenaris and NS Connections

**TWINFIX** : It's a British company founded in 1990 and specialized in supplying polycarbonate sheet and Aluminium glazing systems for roof & vertical glazing. Twinfix has products for securing multiwall and solid polycarbonate as well as glass and double glazed glass units onto both rafter supported structures and structural assemblies where spans of up to 4 metres (with multiwall) are required. The company's multi-Link roof system achieves the required Non-Fragility ratings – ACR(M)001:2014 'Test for Non-Fragility of Profiled Sheeting Roofing Assemblies'.

Our markets include Education, Rail, Commercial, Industrial and Retail as well as serving the traditional construction trades of Builders, Joiners, Glaziers and product for the DIY enthusiast. We are introducing thermally broken glazing systems in order to lower the U or K value in premises so energy saving can be achieved.

If you require more details about the companies above then please visit the Iraq UK Gateway website. We are very interested in developing new business relationship with local and western companies operating in Iraq.
